New!

## Nano Roller Blind

Compact form and easy installation

## *New* type of Roller Blind that solves old problems

*The Roller Blind is one of the most classic forms of window coverings. As Europe's foremost supplier, Luxaflex® is constantly involved in updating and developing its products. The Nano Roller Blind is an excellent example of this.*

## Simple, flexible operation

With the slightest touch, Nano Roller Blinds will smoothly raise and lower via the side profiles. The cassette is so compact that obstructions such as window or door fittings hold no impediment at all. The Nano Roller Blind can be lowered to any desired height.

## Screws and Drills are not required

The Nano Roller Blind is made to measure. The Roller Blind cassette and side profiles are adhered directly onto the window pane with special tape. This means that there is no need for screwing or drilling into the frame. A great advantage of this is that the product can be removed without leaving any traces behind. Installation with mounting clips is also an option if required.

## Double cassette for long windows and privacy

The Top Down/Bottom Up version is suitable for long windows of up to 2.5 m. The fabric is rolled up into two cassettes rather than one. The blind is operated from below as well as above, ensuring every part of the window can be covered. This option is particularly useful when privacy is required whilst still allowing daylight to enter the room.

## Harmonising colours

The Nano Roller Blind is available in no fewer than 50 fabrics, including dim out fabrics for room darkening and fabrics with heat-reflecting foil. Many of the fabrics are also available with other window covering products from Luxaflex®, enabling you to harmonise colours and give your interior a wonderful atmosphere

## Handy operating pole

If the window is so high up that it is difficult to reach, then a specially developed operating pole is available as an option. The carefully balanced mechanism of the Nano Roller Blind runs so smoothly that hardly any effort is needed to open or close it.

The compact form, modern design and simplicity of installation, are all special features of the new Nano Roller Blind. These blinds are developed specially for tilt and turn windows and doors with inset glass. But this doesn't mean that the beautiful Nano Roller Blinds cannot be used to great effect in other places!

Choose Luxaflex® Window Styling for a unique quality product with a five-year guarantee. Luxaflex® Window Styling offer a wide range of attractive window coverings with an extensive choice of materials, colours, designs, finishes and control options. Your dealer will ensure that your Luxaflex® products are tailor-made to your requirements and that they are delivered to your home quickly and reliably.
